

Bond Program Update

Over the past month, we have made significant progress with our bond projects. We are pleased to announce that the Bond Program Managers, TWS Advisory Group, have been selected and have initiated both the Design Process and a Community Engagement campaign. Follow our bond progress on social media for updates on how the bond is moving forward.

In July, the ERO Architect Firm was chosen to design the Bond Projects. The Construction Team solicitation is currently available and the District will be evaluating and selecting a team for Board Approval. We extend our gratitude to the CS CISD Administration and Business Offices for advancing vendors to keep the project on track.

Over the next 30 days, we will hold foundational meetings to design these projects with a focus on their functionality for our young Wildcat learners. The design process usually spans 52 weeks, but our teams will conduct efficient and effective meetings to ensure the design embodies the pride of our young Wildcats.

Exciting Developments for Our Schools Student and Staff Engagement

Over the next semester, our design teams and program managers will conduct detailed meetings to capture the voices of our students and staff. This effort aims to ensure our new projects meet the needs of the 21st-century learner and, more importantly, our young Wildcat learners. Their input on day-to-day operations and how they feel the campuses should be shaped will help us create functional, modern, and inspiring learning environments that will benefit our students for years to come.

Let Us Hear the Wildcat Voice!

We are excited to announce a series of design charrettes aimed at capturing the voices of our community, parents, grandparents, alumni, and you. Your input is crucial in shaping the future of our schools. Join us at these upcoming events to share your thoughts and ideas:

September 27th - Tailgate Charrette
Wildcats vs Cristal City Game

November Design Charrette
Elementary Campus

October 31st - Trunk or Treat Charrette
Halloween

December Design Charrette
Intermediate Campus

Follow the Bond!

Check out the progress
